Singapore Cooperation Programme

Singapore has provided technical assistance to other developing countries since the 1960s. As a country whose only resource is its people, Singapore believes that human resource development is vital for economic and social progress. Singapore itself has benefited from training provided by other countries and international organisations.

In 1992, the Singapore Cooperation Programme (SCP) was established to bring together under one framework the various technical assistance programmes offered by Singapore. Through the SCP, the range and number of training programmes were increased to share Singapore's development experience with other developing countries.

To date, over 137,000 officials from more than 180 countries and territories have participated in our

courses and study visits. The SCP is managed by the Technical Cooperation Directorate of the Ministry of Foreign Affairs, Singapore.

UN Environment Programme

UNEP is the United Nations system's designated entity for addressing environmental issues at the global and regional level. Its mandate is to coordinate the development of environmental policy consensus by keeping the global environment under review and bringing emerging issues to the attention of governments and the international community for action.

Beginning in 2018, UNEP's Sustainable Infrastructure Partnership (SIP) has been working to promote integrated approaches to sustainable infrastructure by raising awareness, facilitating international collaboration, and supporting

capacity building to more fully exploit the interlinkages between infrastructure and the SDGs.

UN Economic and Social Commission for Asia and The Pacific

ESCAP is the most inclusive intergovernmental platform in the Asia-Pacific region. The Commission promotes cooperation among its 53 member States and 9 associate members in pursuit of solutions to sustainable development challenges. ESCAP is one of the five regional commissions of the United Nations.

ESCAP's Sustainable Urban Development Section, part of the Environment and Development Division promotes sustainable urban development across the region through regional dialogues, normative guidance, the establishment of partnerships to support cities and capacity building programmes directly with cities.

In 2019, ESCAP organized the 7th Asia Pacific Urban Forum in Penang, Malaysia, and launched *The Future of Asian & Pacific Cities* report, co-developed with partners including UN-Habitat, the European Union, Asian Development Bank, Rockefeller Foundation, the Centre for Liveable Cities in Singapore, and the UN Development Programme. The report identified four thematic pillars: Urban and Territorial Planning; Urban Resilience; Smart and Inclusive Cities; and Urban Finance.

ESCAP organizes with partners the Asia Pacific Mayors Academy, designed to build the capacity of new mayors in the region to develop sustainable urban solutions in their communities, based on the recommendations in *The Future of Asian & Pacific Cities* report.

ESCAP also delivers a range of capacity building project, including on air pollution, waste and plastic pollution, and localizing the Sustainable Development Goals. In partnership with the Penang Platform for Sustainable Urbanization, ESCAP developed the *Asia Pacific Regional Guidelines for Voluntary Local Reviews* (VLRs) and is working with communities across the region to develop VLRs.

Civil Service College, Singapore

The Civil Service College (CSC) plays a pivotal role in nurturing and developing the Singapore Public Service to meet challenges of the future. Its mission is to develop a first-class Public Service through

training and development. CSC endeavours to be the heart of learning excellence and development for the Public Service in Singapore.

CSC offers a comprehensive suite of programmes that build strategic capability in the public service, focusing particularly on core areas in public governance, leadership, public administration, and management. We work closely with central government and public sector agencies to embed values, communicate public sector directions, and manage change in individuals and organisations. CSC partners public and private sector organisations as well as academia and international government agencies to exchange best practices and experiences in leadership, policy development, public administration, and public reforms. By sharing Singapore Government's experience and best practices, we hope to promote good governance and develop goodwill, co-operation, and understanding between different governments across the world.

Introduction

Infrastructure is central to achieving the Sustainable Development Goals (SDGs). Infrastructure systems are drivers of economic growth and enable access to basic services and economic opportunities that improve livelihoods and well-being. Yet the choices that we make about the types of infrastructure we choose to build and where we choose to build it also have direct and indirect negative impacts on the environment and societies.

The OECD has estimated that US\$6.9 trillion will need to be invested in infrastructure every year to meet achieve the SDGs by 2030. The bulk of this investment is needed in developing countries, in order to meet growing demand generated by strong population growth, increased income levels, and rapid urbanisation.

In March 2019, the United Nations Environment Assembly (UNEA) passed a [resolution](#) on sustainable infrastructure (UNEP/EA.4/L.5) that recognises infrastructure's centrality to the 2030 Agenda. It encourages Member States to develop and strengthen national and regional systems-level strategic approaches to infrastructure planning, promotes nature-based solutions and encourages the international community to support countries in building the technical and institutional

capacity to develop sustainable infrastructure. These actions toward sustainable infrastructure have been further accelerated since a new UNEA 5 Resolution on Sustainable and Resilient Infrastructure was adopted in March 2022.

Course Objectives

This course is designed to help deliver on the UNEA sustainable infrastructure resolutions by increasing the participants' understanding of opportunities and challenges associated with developing sustainable infrastructure, as well as the policy conditions to enable and address them. The course will cover links between infrastructure and the Sustainable Development Goals (SDGs), with an emphasis on building resilience, including through integrated approaches and how planners can maximise SDG outcomes by incorporating sustainability concerns into the early strategic planning of infrastructure. This knowledge can then be incorporated into decision-making processes.

Synopsis of Topics

Topics to be covered include:

- Sustainable infrastructure in the regional context
- Delivering SDGs through sustainable infrastructure: renewable energy, green transport, clean water, waste management, urban development, etc.
- Building resilience, including through Nature-based infrastructure solutions – opportunities and challenges
- Infrastructure system integration and sustainability acceleration
- Green Finance: access to green finance under IFIs funding mechanism, green bonds, GCF, AIIB, PPP to leverage financing, etc
- International tools and instruments to assess and evaluate infrastructure

Methodology

Notwithstanding the virtual modality, the programme is designed to be highly interactive, participatory, and dynamic, taking advantage of a variety of different learning approaches, including:

- Technical presentations from international experts
- Discussions among experts and participants

- Interactive learning opportunities and cross-cultural knowledge exchange
- Cooperation opportunities between stakeholders
- Group project work, culminating in a presentation to the class

Application Procedure

(Closing date for nomination: **16 May 2022**)

The Government of Singapore is pleased to invite the respective National Focal Point for Technical Assistance (NFP) to nominate **up to two (2)** suitable applicants. Selection of candidates will be based on merit. Should there be more applicants than training places, the Government of Singapore seeks the understanding of the respective NFP in the event that its nominee(s) is not selected.

All nominees are to submit their applications online at <https://go.gov.sg/sustainableinfrastructure2022> by **Monday, 16 May 2022**. NFPs are also required to endorse nominees via email links. Instructions and FAQs for Applicants and NFPs can be found at the links below:
